

Dear Horticulture Professionals,

Join other horticultural professionals for the:
**2021 Landscape and Grounds
Maintenance Short Course.**

Our goal is to provide timely information and educational programming that will allow you to improve the quality of service and profitability of your horticultural business. All interested individuals are welcome.

Participants will receive a unique Zoom link via the email provided at registration time for each session enrolled. The unique link cannot be shared with others and accessed with only one device during the session.

There are four weekly virtual sessions beginning Wednesday, February 3rd. The sessions start at 1:00 p.m. and end by 4:00 p.m. on Wednesdays: February 3, 10, 17 and 24.

**For more information, speaker bios,
online registration and payment visit:
go.wisc.edu/SheboyganLGMSC**

CEUs are available for ISA arborists and NALP landscape professionals. Join this program to learn and interact with speakers online!

Week 1: Wednesday February 3

1:00 p.m. - New & Improved Crabapple Selections for Midwestern Landscapes

This talk features time tested and new crabapples varieties that will provide a positive and lasting impact in the landscape.

Jeff Iles, Ph.D., Professor and Chair of the Department of Horticulture, Iowa State University

2:15 p.m. - Pay it Forward: Selecting and Managing Elms in Your Urban Forest

Disease-resistant elms offer great benefits for our urban forests. This in-depth session takes a look at new elms and offers management tips for success.

Chad Giblin, Arborist and Owner, Trees & Me

Week 2: Wednesday February 10

1:00 p.m. - Soil Remediation - Dealing with Compaction After Development and Construction

Learn about soil health techniques for improving the properties of urban soils for better plant growth.

Nina Lauren Bassuk, Ph.D., Professor, Cornell College of Agriculture and Life Sciences

2:15 p.m. - Plant Growth Regulators for Lawns and Landscapes

Traditionally, the use of growth regulators has been confined to golf courses, but research data suggests they could be a valuable tool for managing lawn and landscapes as well.

Doug Soldat, Ph.D. Professor, UW-Madison

Week 3: Wednesday February 17

1:00 p.m. - Diagnosing and Managing Wisconsin's Top Ten Landscape Diseases

Learn about the top landscape diseases found during 2020 and tips on diagnosing as well as control strategies.

Brian Hudelson, Ph.D., Director, Plant Disease Diagnostic Clinic, UW-Madison Extension

2:15 p.m. - Mold or Bug? Differentiating Between Disease and Insect Damage on Turfgrass

This talk will focus on the primary insect and disease pests in Wisconsin lawns, how to identify and differentiate between the two groups, and how to best manage them.

Paul Koch, Ph.D., Turfgrass Specialist, UW-Madison

Week 4: Wednesday February 24

1:00 p.m. - Understanding and Managing Wisconsin's Most Menacing Landscape Insect Pests of 2020

Learn about some of the common insect stories of 2020, and how they may impact us in the coming years.

PJ Liesch, Entomologist, UW-Madison Extension

2:15 p.m. - Consumer Trends in Perennials and Annuals

Each year plant breeders bring new and intriguing plants to market. This talk will highlight some of the best new plants and trends for your garden in 2021 and into the future.

Kevin Roethle, Sale Representative, Ball Seed Company
